

SS1 L-4S

47

(TRA CODE:L-4S) SOOPER SCOOPER -1

A superior underground mining tire is used when maximum wide and extra-deep tread is imperative. This strong nylon construction tire with special tough wearing tread rubber provides increased resistance to cut and wear and an extended tire life in the most severe underground mining conditions. Its resistance to heat build-up is not good as L-3S. Suited for low speed and short haul operations.
