### (TRA CODE:E-2/L-2) THE GIANT HIPPO

The Giant Hippo features a revolutionary new design that marries the construction and bead design of an earthmover tire with the tread design of a forestry tire. The result is a loader tire with unparalleled pulling power and tractive capabilities. The Hippo also features rim shield and sidewall protectors, as well as a buttress shoulder. The buttress shoulder significantly adds to the tire's pulling power, an increase of up to 20%. This tire has gained the respect of several OEM in the reclamation business.
