

### TREAD DESIGN

- **Robust tread blocks** provide high resistance to lacerations.
- **Transversal groove** arrangement promotes excellent **traction** in high **severity conditions**.
- Wide and **deep cross grooves** reduce stone trapping and enhance selfcleaning capability.

### TREAD COMPOUND

Specially formulated to ensure:

- High **mileage** in **on-off road applications**.
- Lower operating temperature improves **tyre integrity** and **retreadability**.
- Excellent **resistance to tears** and **lacerations**.
- **Resistance** to accidental **casing damage**.
