

All Position tyres need to provide grip and handling on the steer, maximise traction and tread life on the drive while also being resistance to irregular wear on the free rolling axle of the trailer. The VA08 is a dependable tyre ideal for mixed service application.

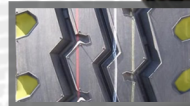

# VORTEX ALL POSITION

## RADIAL TRUCK TYRES

### 11R22.5 - VA08

Large deep shoulder grooves for improved traction and heat dissipation

Zigzag tread pattern design reduces stone retention, maximizes traction in a broad range of applications and enhances brake performance

- Tread compound provides enhanced cut and wear resistance in tough off-road applications
- Specially designed pattern grooves protect against premature and uneven wear whilst improving wet grip
- Reinforced tyre construction engineered with tread life in mind, improves corner stiffness for better treadwear and handling
- A true all purpose tyre designed for versatility to lower overall fleet operating costs
