

**DT990** *OFF ROAD*  
*DRIVE*

**A**

The RoadX DT990 drive tire has been engineered to perform in demanding conditions such as mining, construction and logging applications. The DT990 features an aggressive multi-lug tread design for exceptional off-road traction and an enhanced rubber compound to resist cuts and chunking. Open shoulder ribs deliver superior stability and resistance to uneven wear. The DT990's deep 31/32" tread depth provides long tread life and an exceptional cost per kilometer.

**TIRE FEATURES:**

- 1** Open shoulder design offers excellent self-cleaning performance and increases grip and traction on non-paved roads.
- 2** Block-connecting ribs increase tire rigidity and improves tear resistance.
- 3** Deepened grooves improve grip and traction in off-road conditions.

**B**

Drive position tire traveling short distances in off-road applications. Tread compounding improves cut resistance and reduces block-drop off. Deep groove design effectively improve off-road traction.

**TIRE FEATURES:**

- 1** Deep, interconnected grooves improve traction.
- 2** Tread compounding and block angle design effectively reduce the occurrence of block drop-off and cut resistance.
- 3** Open shoulder design effectively improve heat dissipation.
